Release Notes

3.1

July 2024

Background on USFM 3.1

USFM (Unified Scripture Format Markup) 3.1 primarily represents an effort to standardize a single [content model](#) which can be equally expressed in backslash-based `\` format markers (USFM-FM), XML (USFM-XML), or JSON (USFM-JSON). The common abbreviation for these expressions are USFM, USX, and USJ.

This documentation provides a [summary](#) of markup syntax, schema diagrams, and example texts for both USFM and USX. USJ is a newer expression. Equivalent example texts in USJ are also being added.

Previous release notes (3.0 and earlier) are expressed only in USFM-FM specific terms.

Summary of Updates

The key differences in the grammar from USFM 3.0 to 3.1.0 are:

- [BookTitles](#) are optional.
- [BookHeaders](#) include [sts](#) - Text status.
- [BookIdentification](#) may be any 3 letter code (within reason).
- Other peripherals may be of any type.
- [Section](#), [Verse](#), and other [Para](#) (paragraphs) are separated as different categories (internal).
- The [paragraph](#) [@vid](#) attribute has an extended reference syntax.
- [Character](#) markers and [nesting](#):
 - All [character](#) elements must be closed *explicitly*, with the exception of note structural elements (below).
 - Note specific [character](#) elements (i.e. [f](#)... [fr](#) - Origin reference, [fq](#) - Translation quote, [ft](#) - Note text, or [x](#)... [xo](#) - Origin reference, [xt](#) - Target references etc.) are considered note *submarker elements*. They provide structure to the note content. These note submarker elements continue to support (and recommend) the common practice of implicit closure.
 - Note content must occur within a submarker element; there can be no unmarked note content only within the [note container](#) itself.
 - [fv](#) - Verse number is now just a [character](#) style and requires explicit closing.
 - Use of the `\+` prefix for nested USFM [character](#) markup is supported but is *deprecated*. Note that future versions of USFM may remove support for the `\+` syntax entirely.
- Markings scripture references — [ref](#) - Scripture reference and [xt](#) - Target references:

- Added [ref - Scripture reference](#) for marking scripture references in all contexts (including [xt - Target references](#)), with an optional machine-readable target location.
- *Deprecated* use of the attribute [@link-href](#) with [xt - Target references](#). Use [ref - Scripture reference](#).
- *Deprecated* use of [xt - Target references](#) outside of [cross-reference](#). Use: [ref - Scripture reference](#).
- Deprecate the [link-](#) prefix in [jmp - Link text](#) attributes.
- Add [@key](#) attribute to the [k - Keyword/keyterm](#) character element.
- [@sid](#) and [@eid](#) attributes are not automatically available for all [milestones](#), but may be used when specified directly (e.g. [qt](#) and [ts](#))
- [\](#) escaping is required and supported for a number of key characters: [\](#), ['](#), ["](#), [|](#), [~](#), [/](#)
- Whitespace rules are [clarified and formalised](#).

3.0

April 2018

Additions

- USFM version identifier: [\usfm](#).
- Alternate language table of contents texts: [\toca#](#)
- Letter opening: [\po](#)
- List header and footer elements: [\lh](#) and [\lf](#)
- Embedded list: [\lim#](#)
- Structured list items: [\lik ...\lik*](#) and [\liv# ...\liv#*](#)
- List item total: [\litl ...\litl*](#)
- Hebrew note: [\qd](#)
- Semantic division: [\sd#](#)
- Aramaic wordlist entry: [\wa ...\wa*](#)
- Geographic proper name: [\png ...\png*](#)
- List of witnesses in footnotes (for critical editions): [\fw ...\fw*](#)
- Target references “added” text: [\xta ...\xta*](#)
- Published cross reference origin text: [\xop ...\xop*](#)
- Link text: [\jmp ...\jmp*](#)
- Ruby glosses (CJK texts): [\rb ...\rb*](#)
- Superscript: [\sup ...\sup*](#)
- Quotation start/end milestones: [\qt#-s*](#) and [\qt#-e*](#)
- Translator’s section (chunk) milestones: [\ts-s*](#) and [\ts-e*](#)

- Common [peripheral identifiers](#).

Revisions

- Restored `\pr` for use as “text refrain”.
- Support for explicit [table cell column spanning](#).
- Support citation form for wordlist/glossary text (update `\w ...w*`).
- Revised syntax for figures/illustrations - applying descriptive attributes: `\fig ...fig*`
- *Deprecated* cross reference and footnote DC content markers: `\xdc ...xdc*` and `\fdc ...fdc*`
- *Deprecated* combined marker for proper name within translator’s addition: `\addpn ...addpn*`
- *Deprecated* numbered running header: `\h#`
- *Deprecated* pronunciation info marker: `\pro ...pro*` in favour of ruby annotations `\rb ...rb*`

Syntax and Features

- Syntax for assigning [character-level attributes](#).
 - Attributes for `\w ...w*`.
 - Attributes for `\fig ...fig*`.
- Syntax for assigning word-level [linking attributes](#).
 - Default link-href linking attribute for `\xt ...xt*`.
- Syntax for [milestones](#).
- Syntax for peripheral (`\periph`) [identifiers](#).

2.5

October 2013

- Stylesheet only configuration update for Paratext 7.5 release.

2.4

June 2013

Additions

- Support for [nesting](#) character markup.

2.3

July 2010

Additions

- Added study Bible cross reference marker `\ex` for adding additional cross-references to the notes project.

Revisions

- *Deprecated* - Study Bible footnote marker `\fs` for marking a footnote summary text.
- Revised markup specification for study Bible [sidebars](#) (use any title, paragraph, poetry, table, or special text marker elements).

2.2

October 2008

Additions

- Added character markers `\xot ... \xot*` and `\xnt ... \xnt*` for uniquely marking target references to OT and NT passages (use of these markers is optional)
- Added `\igt ... \igt*` to mark (scripture) quotations appearing in the introduction.

Revisions

- `\imte#` now includes an optional numeric variable (multiple levels).
- No-break space should now be marked using `~` (tilde), not `!$`

2.1

April 2007

Additions

- Added `\ili` for marking introduction list items.
- Reviewed and finalized [Peripheral](#) content markup:
 - Added new back matter books [CNC](#), [GLO](#), [TDX](#), [NDX](#).
 - Added [INT](#) book for scripture division Introductions.
 - Updated scheme for marking content divisions in [FRT](#), [INT](#), [BAK](#), [OTH](#)
 - Added various new content division markers.

Revisions

- Finalized Study Bible Content markup.
- Reviewed and finalized [Peripheral](#) content markup.
- Changed `\rq ... \rq*` from paragraph to character level markup.

- Changed `\ca ... \ca*` from paragraph to character level markup.

2.05

June 2006

Additions

- Added `\rq` for marking inline quotation references.

2.04

October 2005

Additions

- Added `\toc3` for providing the standard abbreviation for a book.

2.03

August 2005

Additions

- Added `\toc1` and `\toc2` for providing and marking long and short table of contents texts.
- Added `\fl` for marking footnote “label” text items.
- Added `\fp` for marking footnote additional paragraphs.

2.0

October 2004

Changes in USFM from 1.53 to 2.0.

Additions

- Add character style `\em ... \em*` for “emphasis”.
- In Peripherals:
 - Add `\intro` section to Front Matter (in addition to Preface).
 - Add `\maps` (Maps Index) section to Back Matter.
 - Define `books` for FRT, BAK, and OTH rather than using the book names XXA, XXB, and XXC for these materials.
- Add `\sr` for marking the text references range listed under a section heading `\s`.
- Add the following markers for “embedded text” (see example references – not all versions mark

these items the same).

- `\pm` - Embedded text paragraph
- `\pmo` - Embedded text opening
- `\pmc` - Embedded text closing
- `\pmr` - Embedded text refrain
- `\qm#` - Embedded text poetic line
- Add character style `\pro ... \pro*` for indicating pronunciation (in CJK texts). (Deprecated - See `\rb ... \rb*`)
- Add character style `\wj ... \wj*` for marking words of Jesus.

Revisions

- Removed `\pdi` and `\pde`, and substitute with embedded text markup (see Additions, below)
- Removed `\wr ... \wr*`. This was really a duplicate of `\w ... w*` used for marking words in the scripture text which are included in the wordlist.
- Removed `\ps`. This is used in conjunction with `\nb` to indicate that the paragraph spans the chapter boundary. It should be sufficient to just start the new chapter with `\nb` and use the appropriate paragraph marker for the previous chapter (`\p`, `\m` etc.)

Introduction

Standard Format Markers (SFM) have been used for many years within the Bible translation community for marking the elements within a digital Scripture text. Over time the backslash-based syntax (\) was used in diverging ways. In 2002 a working group within the United Bible Societies produced a specification for a single SFM dialect which facilitated the validation and sharing of Scripture content between teams, organizations and technologies. That specification was called *Unified Standard Format Markers*, or **USFM**.

With version **3.1**, USFM (*Unified Scripture Format Markup*) standardizes a single [content model](#) which can be equally expressed in backslash-based \ format markers (USFM-FM), XML (USFM-XML), or JSON (USFM-JSON). The common abbreviation for these expressions are **USFM**, **USX**, and **USJ**.

- [General Markup Syntax](#)
- [User Extensions](#)
- [Whitespace](#)
- [Documentation Syntax](#)
- [Glossary of Terms](#)

General Markup Syntax

There are five general categories of USFM markup:

- [Chapters and Verses](#)
- [Paragraphs](#)
- [Characters](#)
- [Notes](#)
- [Milestones](#)

Markup Expressions

USFM (USFM-FM)

USFM is a backslash-based \ representation of the USFM data model. In USFM, all markers begin with a backslash character \.

- [Paragraph](#) markers, and the opening marker for [characters](#) and [notes](#) are followed by a space. Example: \p .
- [Character](#) markers occur in pairs, marking a span of text within a paragraph. The closing marker is identical to the opening marker, terminated with an asterisk character *. Example: \w grace\w*.
- [Note](#) markers also occur in pairs, marking the start and end of the [footnote](#) or [cross reference](#) content.

- **Milestone** markers follow a syntax similar to **character markers**, but using a self-closing syntax which immediately terminates the marker with a second backslash plus asterisk `\*`. Example: `\\qt-s\*`
- **Chapters** and **verses** are unique elements. Their syntax is similar to a paragraph marker. The chapter or verse number itself is added after the marker and its space. Chapter and verses are also like milestones because they identify the location for the start of a chapter or verse. In USFM there is no marker to indicate the end of a chapter or verse.

USX (USFM-XML)

USX is an XML representation of the USFM data model.

- **Paragraphs** occur within a `<para>` element.
- **Character** spans occur within a `<char>` element.
- **Notes** occur within a `<note>` element.
- **Milestones** occur as an `<ms/>` element.
- **Chapters** and **verses** occur as 'milestone-like' self-closing `<chapter/>` or `<verse/>` elements which identify the start for a chapter or verse. Optionally, `<chapter/>` and `<verse/>` elements can be added to mark the end of a chapter or verse by using the `eid` attribute instead of the `sid` attribute. The end elements should be placed at the end of the Scripture text for chapter or verse.

Different *types* of paragraph, character, note, or milestones are identified by a `style` attribute. The `style` attribute is the value which associates the element with its corresponding USFM marker.

USJ (USFM-JSON)

USJ is a JSON representation of the USFM data model. It is a first-class citizen among the other formats (USFM and USX) and has been added as a target in the test suite maintained by the committee.

JSON (JavaScript Object Notation) is a modern data serialization format supported by many software tools and libraries. It is especially convenient to use in JavaScript-based technologies where it is natively supported.

- **Chapters and verses** are treated as milestones – denoting only their absolute position and not encapsulating text or other content within them.
- **Chapter** elements are valid at the outermost level – the same level as id and book headers.
- **Verse** elements, like character elements, are valid within paragraph-like parents at the same level as the textual content.
- The `type` key has values that refer to the node types in USX. e.g. `para`, `char`, `book`, `chapter`, `verse`, `ms`.
- The `marker` key has values that refer to marker names used in USFM and the style attribute in USX.
- Every attribute in a USX node becomes a key in the corresponding JSON object.

```
{
  "type": "book",
  "marker": "id",
  "code": "GEN",
  "content": []
},
{
  "type": "chapter",
  "marker": "c",
  "number": "1",
  "sid": "GEN 1"
}
```

- All objects may have nested content or textual content in an array for the **contents** key whose value is an array.

```
{
  "type": "para",
  "marker": "ide",
  "content": ["UTF-8"]
},
{
  "type": "para",
  "marker": "usfm",
  "content": ["3.0"]
},
{
  "type": "para",
  "marker": "is",
  "content": [
    "Introduction"
  ]
},
{
  "type": "para",
  "marker": "ip",
  "content": [
    {
      "type": "char",
      "marker": "bk",
      "content": [
        "The Gospel according to Mark"
      ]
    },
    " begins with the statement..."
  ]
}
```

Additional Syntax Notes

Numbered Markers/Styles

Some markers or styles include an optional numeric variable, which is represented in this documentation by a hash character `#`. The number indicates:

- A portion of a larger text, or relative weighting of the components of the text, such as `mt1`, `mt2`, `mt3` which are parts of a `main title`.
- The level of a division or section (hierarchy).
- The level of indentation relative to other like elements, as in poetry (`q# - Poetic line`) or lists (`li# - List entry`) or outlines (`io# - Intro outline entry`).

marker = marker1 — The *unnumbered* version of a marker or style should only be used when one level of this marker exists within the text (only). *Numbered* markers should always be used when more than one level of the marker exists within the text.

A specific numbered marker or style should not be used to indicate a specific occurrence of the element type (i.e. you should not use `s3` to represent the the particular section heading occurring before the "Story of Creation" in Genesis 1.)

USFM Endmarkers in Footnotes and Cross References

Elements which make up `footnote` or `cross reference` content are `character` level markers. **With USFM 3.1**, ending character markers have been made required — except for the markers used to start sections in footnotes and cross references (the note's 'structural elements'). The majority of scripture translation projects working with USFM already follow the implicit closure syntax for footnote or cross reference structural markup.

Examples of the two markup approaches for notes are given below. Both of these are syntactically acceptable in USFM, but the implicit syntax is strongly recommended. Note content *must always occur within a submarker*; there can be no unmarked note content only within the `note container` itself.

Other `nested` character markers within a notes structural sections *always* require explicit opening and closing markers.

USFM (implicit closure)

```
\f + \fk Issac: \ft In Hebrew means "laughter"\f*
```

USFM (explicit closure)

```
\f + \fk Issac: \fk*\ft In Hebrew means "laughter"\ft*\f*
```

USX

```
<note caller="+" style="f">
  <char style="fk">Issac: </char>
  <char style="ft">In Hebrew means "laughter"</char>
</note>
```

USFM (implicit closure)

```
\f + \fr 1.14 \fq religious festivals; \ft or \fqa seasons.\f*
```

USFM (explicit closure)

```
\f + \fr 1.14 \fr*\fq religious festivals; \fq*\ft or \ft*\fqa seasons.\fqa*\f*
```

USX

```
<note caller="+" style="f">
  <char style="fr">1.14 </char>
  <char style="fq">religious festivals; </char>
  <char style="ft">or </char>
  <char style="fqa">seasons.</char>
</note>
```

USFM (implicit closure)

```
\f + \fr 2.4 \fk The \nd Lord\nd*: \ft See \nd Lord\nd* in Word List.\f*
```

USFM (explicit closure)

```
\f + \fr 2.4 \fr*\fk The \nd Lord\nd*: \fk*\ft See \nd Lord\nd* in
Word List.\ft*\f*
```

USX

```
<note caller="+" style="f">
  <char style="fr">2.4 </char>
  <char style="fk">The <char style="nd">Lord</char>: </char>
  <char style="ft">See <char style="nd">Lord</char> in Word List.</char>
</note>
```

User Extensions

Users may create and use non-standard markup extensions. User created markers should always begin with **z**. For Example: `\zmyp` or `<para style="zmyp">`. User extended markup is NOT considered part of the USFM/USX standard. An application or processor is not required to provide support for user extensions, and is also free to ignore this markup when it is encountered in a text.

Defining Extensions

A basic specification for markup extensions used in a text should be provided in a file named `markers.ext`. For each marker, supply the following:

`\marker`

Marker text

`\category`

Marker category, from the following list:

- **Paragraph**
 - `header` - Header/identification paragraph
 - `title` - Book title paragraph
 - `introduction` - Introduction text paragraph
 - `sectionpara` - Section heading paragraph
 - `versepara` - Verse text paragraph
 - `list` - List paragraph (verse text)
 - `otherpara` - Other (non verse text) paragraph
- **Note**
 - `crossreference` - Cross Reference container
 - `footnote` - Footnote container
- **Character**
 - `char` - Character-level container (span)
 - `introchar` - Introduction text character span
 - `listchar` - List text character span
 - `footnotechar` - Footnote text character span
 - `crossreferencechar` - Cross reference text character span
- **Milestone**
 - `milestone` - Milestone
- **Other**
 - `internal` - Internal

\description

Marker description

\attribute

As needed - Required or optional attribute (used with Character marker categories). If more than one attribute is specified for the marker, provide a separate \attribute field for each.

Examples

Example 1. markers.ext

```
\marker zmyp
\category versepara
\description An paragraph marker extension.
```

Example 2. markers.ext

```
\marker zmyc
\category char
\description A character marker extension.
\attribute x-myattr1
```

Whitespace

Definition

In USFM/USX, a 'common whitespace' (**WS**) character is **defined** by the pattern `/(?:${ws}|${nl}|$)/`, where:

ws

```
/[\u0009\u000D\u000A\u0020]/
```

- A single whitespace character.

nl

```
/(?:\u000D?\u000A|\u000D)/
```

- A single newline (as supported by all operating systems).

Common whitespace is found throughout the document **content** for most languages.

Some common whitespace in USFM/USX documents is 'structural whitespace'. Structural (*non-content*) whitespace exists either to aid in the readability of a source file, or to delimit markers. Structural whitespace is identified in the documentation's syntax diagrams (**WS/WS/HS/HS**) and is not part of the document **content**.

All other characters are always treated as **content** (including other **Unicode whitespace** characters).

Reducing or Eliminating Common Whitespace

- Any common whitespace is **reduced** according to these rules:
 - Any string of **WS** chars which includes a newline is reduced to a single newline.
 - Any string of **WS** chars which does not include a newline is reduced to a single space.
- Common whitespace can be **eliminated** when it occurs:
 - At the start of any element's **content**.
 - At the end of any element's **content**, except inside a **character** element, when followed by text or another **character** element.
- Common whitespace **canonicalization** is done as follows:
 - A newline before a **character** marker is converted to a space. That space is **content**.
 - Any whitespace before a **paragraph** marker, including none, is replaced by a newline. This newline is not **content**.

USX documents contain common whitespace that delimits aspects of the XML syntax itself. XML allows for unlimited whitespace wherever it is permitted by the XML syntax, which is typically added for the purpose of formatting for easier reading (i.e. 'pretty-printing').

Documentation Syntax

A brief explanation of the syntax used throughout this documentation is given below.

Most documentation pages for USFM/USX markup contain one or more of the following sections.

- [Summary](#)
- [Diagrams](#)
- [Examples](#)
- [Properties](#)
- [Publication Issues](#)

Summary

A summary of the 1) **type** of markup found in the current documentation section (e.g. [paragraphs](#), [characters](#)), [notes](#), or 2) a **specific instance** of a markup type (e.g. [p](#) - [paragraph](#), [nd](#) - [Name of God](#), [footnote](#)).

Description

A short description of the markup.

Syntax

A summary of the markup syntax is given in both **USFM** and **USX** syntax. The following

conventions are used:

- **markup** : Monospaced text with a grey background is the explicit marker text required.
- **placeholder** : Red, italic text is a placeholder. The content which should be provided at the position of the placeholder is described below the syntax summary.
- **@attribute** : Required or optional **attributes** are listed as placeholders in red, italic text preceded by an **@** symbol.
- **placeholder** or **@attribute** content which is required is identified by an * asterisk.

Style Type

If the documentation page is for a specific instance of a markup type, a link to the summary documentation for that marker type is given. For example: **p** - **Paragraph** is a type of **Paragraph**.

Valid In

The **document division**, **paragraph**, or **note** type where the selected markup is valid.

Added

The version of USFM/USX when this markup was added.

Updated

The version of USFM/USX when this markup was updated, corrected, or possibly *deprecated*.

Throughout this documentation, texts shown between square brackets, with a grey background, in **[monospacedFont]** are the names used for classes or terminals within the USFM/USX RNG schema. These names correspond to the terminal labels shown in syntax diagrams throughout the documentation.

Diagrams

'Railroad' diagrams illustrate the syntax for components of the USFM/USX schema. Where a diagram is provided, USFM and USX expressions are given in separate tabs. Railroad diagrams for the **paragraph** element are shown below:

USFM

USX

- Diagrams are read from left to right.
- USFM markup is shown in containers with a green background. USX is shown with a purple background.
- Explicit markup text is shown within quotation marks, or (for USX) within XML wedges `<>`.
- Markup text which matches a regular expression pattern is shown between 2 forward slashes `/.../`
- Markup text from an enumeration of options are shown within a dotted outline.

- Terminals are shown in containers with rounded corners, and labelled in **ALLCAPS**. The definitions for terminal labels are given in the [glossary](#).
- A container identifying a markup type is shown with square corners, with a label identifying the type (e.g. [Footnote](#), [CrossReference](#), [Char](#), [Milestone](#), [Verse](#)).

Examples

One or more working text examples in USFM, USX, and USJ are given, usually together with a formatting sample. Examples for [p - paragraph](#) are shown below:

USFM

Example 3. Mark 1.1-4 (GNT)

```
\id MRK
\c 1
\s1 The Preaching of John the Baptist
\r (Matthew 3.1-12; Luke 3.1-18; John 1.19-28)
\p
\v 1 This is the Good News about Jesus Christ, the Son of God.
\v 2 It began as the prophet Isaiah had written:
\q1 "God said, "I will send my messenger ahead of you
\q2 to open the way for you."
\q1
\v 3 Someone is shouting in the desert,
\q2 "Get the road ready for the Lord;
\q2 make a straight path for him to travel!"
\p
\v 4 So John appeared in the desert, baptizing and preaching. "Turn away from
your
sins and be baptized," he told the people, "and God will forgive your sins."
```

USX

Example 4. Mark 1.1-4 (GNT)

```
<usx version="3.1">
  <book code="MRK" style="id"/>
  <chapter number="1" style="c" sid="MRK 1"/>
  <para style="s1">The Preaching of John the Baptist</para>
  <para style="r">(Matthew 3.1-12; Luke 3.1-18; John 1.19-28)</para>
  <para style="p">
    <verse number="1" style="v" sid="MRK 1:1" />This is the Good News about
    Jesus
    Christ, the Son of God. <verse eid="MRK 1:1" /><verse number="2" style="v"
    sid="MRK 1:2" />It began as the prophet Isaiah had written:</para>
    <para style="q1" vid="MRK 1:2">"God said, "I will send my messenger ahead of
    you
    </para>
    <para style="q2" vid="MRK 1:2">to open the way for you.<verse eid="MRK 1:2"
```

```

/>
</para>
<para style="q1">
  <verse number="3" style="v" sid="MRK 1:3" />Someone is shouting in the
desert,
</para>
<para style="q2" vid="MRK 1:3">□Get the road ready for the Lord;</para>
<para style="q2" vid="MRK 1:3">make a straight path for him to travel!□□
  <verse eid="MRK 1:3" /></para>
<para style="p">
  <verse number="4" style="v" sid="MRK 1:4" />So John appeared in the desert,
baptizing and preaching. □Turn away from your sins and be baptized,□ he told
the people, □and God will forgive your sins.<verse eid="MRK 1:4" /></para>
</usx>

```

USJ

Example 5. Mark 1.1-4 (GNT)

```

{
  "type": "USJ",
  "version": "3.1",
  "content": [
    {
      "type": "book",

The Preaching of John the Baptist

(Matthew 3.1-12; Luke 3.1-18; John 1.19-28)

1 This is the Good News about Jesus Christ, the Son of God.^a **2**It began as the prophet Isaiah had written:

“God said, ‘I will send my messenger ahead of you to open the way for you.’

3 Someone is shouting in the desert, ‘Get the road ready for the Lord; make a straight path for him to travel!’”

4So John appeared in the desert, baptizing and preaching.^b “Turn away from your sins and be baptized,” he told the people, “and God will forgive your sins.” **5**Many

Properties

A list of additional properties for the current markup type or specific markup instance.

Publication Issues

A list of notes, guidance, or specific concerns related to publishing the content used with the current markup.

Glossary of Terms

Definitions for terms used within the USFM/USX schema and diagrams.

hs

Pattern: `/[\u0009\u0020]/` A single simple horizontal (non newline) whitespace character

HS

Pattern: `/${hs}+/` A sequence of more horizontal whitespace characters

Hs

Pattern: `/ ${hs} */` A sequence of zero or more horizontal whitespace characters

nl

Pattern: `/ (?: \u000D? \u000A | \u000D) /` A single newline (as supported by all operating systems)

NL

Pattern: `/ ${nl} + /` A sequence of newline characters

ws

Pattern: `/ (?: ${hs} | ${nl} | $) /` A reducible whitespace character, including a single newline sequence

anyws

Pattern: `/ [ \u0009 \u000A \u000D \u0020 ] /` Matches any single reducible whitespace character, may split newline

WS

Pattern: `/ ${anyws} + /` A sequence of reducible whitespace characters

Ws

Pattern: `/ ${anyws} * /` A sequence of zero or more reducible whitespace characters

allws

Pattern: `/ [ \u0009 - \u000D \u0020 \u00A0 \u1680 \u2000 - \u200B \u2028 \u2029 \u202F \u205F \u3000 ] /` All possible whitespace characters including content whitespace. Matches a single character

WSNL

Pattern: `/ ${HS} ${NL} /` A sequence of non-newline whitespace up to and including a newline

TAGEND

Pattern: `/ (?: ${ws} + | (?: [ \\\\ ] | $) ) /` Delimits a marker

TEXTEND

Pattern: `/ (?: ${anyws} * \\\\ | $) /` Delimits simple text

ATTRIBTEXTEND

Pattern: `/ ${Hs} (?: [ \\\\ ] ) /` Reducible characters following an attribute value

ATTRIBTEXT

Pattern: `/ (?: [ \\\\ [ " \\ = ~ / ] | [ ^ \\\\ " ] ) + /` Matches text inside an attribute value (not including the quotes)

ATTRIBALL

Pattern: `/ (?: [ ^ \\\\ = ] | \\\\ = ) + (?: [ \\\\ ] ) /` Matches a default attribute value string

ATTRIBNAME

Pattern: `/ [ a - z A - Z 0 - 9 \_ - ] + ? /` Matches an attribute name

TEXT

Pattern: `/([^\|\\\/~\|])+/` Matches simple text up to the next marker

TEXTNWS

Pattern: `/.(?=[Ws]\\[^\|\\\/])+/` Matches simple text without trailing whitespace

TEXTNOTATTRIB

Pattern: `/(:[^\|\\\/]|\\[^\|\\\/~|])+/` Matches simple text up to the start of a sequence of attributes delimited by |

TEXTNOTATTRIBOPT

Pattern: `/(:[^\|\\\/]|\\[^\|\\\/~|])*/` Matches simple text up to the start of a sequence of attributes delimited by | if present

PIPE

Pattern: `/[hs]*(?!\\|)[hs]*/` Matches the attributes list delimiter of |

TLC

Pattern: `/[0-9A-Z]{3}/` Three letter uppercase code including digits

VERSE

Pattern: `/[1-9][0-9]*[\p{L}\p{Mn}]*([?[\- ,][0-9]+[\p{L}\p{Mn}]*)*/` Verse number, including ranges and sequences

VID

Pattern: `/[A-Z1-4]{3} ?[\p{a-z0-9,\-}:\p{L}\p{Mn}]*/` USX eid, sid, vid references

MID

Pattern: `/[\p{L}\d_\-\. :]+/` Milestone sid or eid any identifier, in effect

HREF

Pattern: `/(.*\\\/\|/?(.*\\\/?)+)|((prj:[A-Za-z\0-9]{3,8})?[A-Z1-4]{3} \d+:\d+(\-\\d+)?)|(^#s+)/` href bible reference

Document Structure

A USFM or USX document consists of valid elements for [Scripture](#) or [Peripheral](#) content organized within a sequence of divisions.

Scripture

[Scripture]

- [BookIdentification] — [Book Identification](#)
- [BookHeaders] — [Book Headers](#)
- [BookTitles] — [Book Titles](#)
- [BookIntroduction] — [Book Introduction](#)
- [BookIntroductionEndTitles] — [Book Introduction End Titles](#)
- [BookChapterLabel] — [Book Chapter Label](#)
- [ChapterContent] — [Chapter Content](#)

Book Identification

[BookIdentification]

- **Document Structure** > **id** - Book identification, **usfm** - USFM version

Book Headers

[BookHeaders]

USFM

USX

An optional collection of one or more [paragraph](#) elements for book name and abbreviation texts.

- **Paragraphs > Identification** > [ide](#) - Character encoding, [h](#) - Running header text, [toc#](#) - Book name texts, [toca#](#) - Alternate book name texts, [rem](#) - Remarks, [sts](#) - Text status

Book Titles

[BookTitles]

USFM

USX

- A collection of one or more [paragraph](#) elements for book main titles.
 - **Paragraphs > Titles and Sections > [mt#](#) - Main title**
 - **Paragraphs > Introductions > [imt#](#) - Intro major title**
 - **Paragraphs > Identification > [rem](#) - Remarks**
- An optional collection of one or more embedded elements.
 - [\[Footnote\]](#) — [Footnotes](#)
 - [\[CrossReference\]](#) — [Cross References](#)
 - [\[Char\]](#) — [Characters](#)
 - [\[Break\]](#) — [Optional line break](#)

Book Introduction

[\[BookIntroduction\]](#)

USFM

USX

- An optional collection of [paragraph](#) and [table](#) elements for book introductions.
 - **Paragraphs > Introductions** > [imt#](#) - Intro major title, [imte](#) - Intro major title end, [ib](#) - Intro blank line, [ie](#) - Intro end, [ili#](#) - Intro list entry, [imi](#) - Intro indented margin, [imq](#) - Intro quote margin, [im](#) - Intro margin, [io#](#) - Intro outline entry, [iot](#) - Intro outline title, [ipi](#) - Intro indented, [ipq](#) - Intro quote, [ipr](#) - Intro right-aligned, [ip](#) - Intro paragraph, [iq#](#) - Intro poetic line, [is#](#) - Intro section heading, [iex](#) - Intro bridge text, [rem](#) - Remarks
 - [\[Table\]](#) — **Paragraphs Tables**
- An optional collection of one or more embedded elements.
 - [\[Footnote\]](#) — [Footnotes](#)
 - [\[CrossReference\]](#) — [Cross References](#)
 - [\[Char\]](#) — [Characters](#)
 - [\[IntroChar\]](#) [Introduction Characters](#)
 - [\[Milestone\]](#) — [Milestones](#)

Book Introduction End Titles

[\[BookIntroductionEndTitles\]](#)

USFM

USX

- An optional collection of one or more [paragraph](#) elements for book titles occurring at the end of the book introduction.
 - **Paragraphs > Introductions > [imt#](#) - Intro major title**
 - **Paragraphs > Titles and Sections > [mt#](#) - Main title**
- An optional collection of one or more embedded elements.
 - [[Footnote](#)] — [Footnotes](#)
 - [[CrossReference](#)] — [Cross References](#)
 - [[Char](#)] — [Characters](#)
 - [[Milestone](#)] — [Milestones](#)
 - [[Break](#)] — [Optional line break](#)

Book Chapter Label

[BookChapterLabel]

- An optional [paragraph](#) element used for providing a chapter heading text which may be applied when formatting all chapters as headings.
 - **Paragraphs > Identification > [cl - Chapter label](#)**

Chapter Content

[ChapterContent]

USFM

USX

- An optional collection of [chapter](#), [section](#), [paragraph/poetry](#), [list](#), [table](#), or [sidebar](#) elements for the main content of a scripture book.
 - [\[Chapter\]](#) — **Chapters and Verses** > [c](#) - Chapter number
 - [\[Section\]](#) — **Paragraphs** > **Titles and Sections** > [cd](#) - Chapter description, [cl](#) - Chapter label, [iex](#) - Intro bridge text, [ip](#) - Intro paragraph, [mr](#) - Major section range, [ms#](#) - Major section heading, [mte#](#) - Main title, [r](#) - Parallel references, [s#](#) - Section heading, [sp](#) - Speaker identification, [sd#](#) - Semantic division, [sr](#) - Section range
 - [\[Para\]](#) — **Paragraphs** > **Body Paragraphs** > [b](#) - Blank line, [cls](#) - Letter closing, [m](#) - Continuation (margin), [mi](#) - Indented continuation, [nb](#) - No break, [p](#) - Paragraph, [pc](#) - Centered, [ph](#) - Indented hanging, [pi#](#) - Indented, [pm](#) - Embedded paragraph, [pmc](#) - Embedded closing, [pmo](#) - Embedded opening, [pmr](#) - Embedded refrain, [po](#) - Letter opening, [pr](#) - Right-aligned
 - **Paragraphs** > **Poetry** > [b](#) - Blank line, [q#](#) - Poetic line, [qa](#) - Acrostic heading, [qc](#) - Centered, [qd](#) - Hebrew note, [qm#](#) - Embedded poetic line, [qr](#) - Right-aligned
 - [\[List\]](#) — **Paragraphs** > **Lists** > [lf](#) - List footer, [lh](#) - List header, [li#](#) - List entry, [lim#](#) - Embedded list entry
 - [\[Table\]](#) — **Paragraphs** > [Tables](#)
 - [\[Sidebar\]](#) — [Sidebars](#)
- An optional collection of one or more embedded elements.
 - [\[Verse\]](#) — [v](#) - Verse number
 - [\[Footnote\]](#) — [Footnotes](#)

- `[CrossReference]` — [Cross References](#)
- `[Char]` — [Characters](#)
- `[Milestone]` — [Milestones](#)
- `[Break]` — [Optional line break](#)

Peripheral

`[Peripheral]`

See the documentation section on [peripherals](#) for more detail on the strategy for marking project peripheral contents.

- `[PeripheralBook]` — [Peripheral Book](#) - Standalone peripheral book.
- `[PeripheralDividedBook]` — [Peripheral Divided Book](#) - Peripheral book with optional [divisions](#).

Peripheral Book (Standalone)

`[PeripheralBook]`

- `[BookHeaders]` — [Book Headers](#)
- `[BookTitles]` — [Book Titles](#)
- `[BookIntroduction]` — [Book Introduction](#)
- `[BookIntroductionEndTitles]` — [Book Introduction End Titles](#)
- `[PeripheralContent]` — [Peripheral Content](#)

Peripheral Divided Book

`[PeripheralDividedBook]`

- `[PeripheralDivision]` — [Peripheral Division](#)

Peripheral Division

`[PeripheralDivision]`

USFM

- **Peripherals** > **periph** - Peripheral division identifier
 - **[BookHeaders]** — Book Headers

- [BookTitles] — Book Titles
- [BookIntroduction] — Book Introduction
- [BookIntroductionEndTitles] — Book Introduction End Titles
- [PeripheralContent] — Peripheral Content

Peripheral Content

[PeripheralContent]

USFM

USX

- An optional collection of [chapter](#), [section](#), [paragraph/poetry](#), [list](#), [table](#), or [sidebar](#) elements for the main content of a scripture book.
 - [\[Chapter\]](#) — **Chapters and Verses** > [c](#) - Chapter number
 - [\[Section\]](#) — **Paragraphs** > **Titles and Sections** > [cd](#) - Chapter description, [cl](#) - Chapter label, [iex](#) - Intro bridge text, [ip](#) - Intro paragraph, [mr](#) - Major section range, [ms#](#) - Major section heading, [mte#](#) - Main title, [r](#) - Parallel references, [s#](#) - Section heading, [sp](#) - Speaker identification, [sd#](#) - Semantic division, [sr](#) - Section range
 - [\[Para\]](#) — **Paragraphs** > **Body Paragraphs** > [b](#) - Blank line, [cls](#) - Letter closing, [m](#) - Continuation (margin), [mi](#) - Indented continuation, [nb](#) - No break, [p](#) - Paragraph, [pc](#) - Centered, [ph](#) - Indented hanging, [pi#](#) - Indented, [pm](#) - Embedded paragraph, [pmc](#) - Embedded closing, [pmo](#) - Embedded opening, [pmr](#) - Embedded refrain, [po](#) - Letter opening, [pr](#) - Right-aligned
 - **Paragraphs** > **Poetry** > [b](#) - Blank line, [q#](#) - Poetic line, [qa](#) - Acrostic heading, [qc](#) - Centered, [qd](#) - Hebrew note, [qm#](#) - Embedded poetic line, [qr](#) - Right-aligned
 - [\[List\]](#) — **Paragraphs** > **Lists** > [lf](#) - List footer, [lh](#) - List header, [li#](#) - List entry, [lim#](#) - Embedded list entry
 - [\[Table\]](#) — **Paragraphs** > [Tables](#)
 - [\[Sidebar\]](#) — [Sidebars](#)
- An optional collection of one or more embedded elements.
 - [\[Verse\]](#) — [v](#) - Verse number
 - [\[Footnote\]](#) — [Footnotes](#)

- [\[CrossReference\]](#) — [Cross References](#)
- [\[Char\]](#) — [Characters](#)
- [\[Milestone\]](#) — [Milestones](#)
- [\[Break\]](#) — [Optional line break](#)

id - Book identification

Summary

Description

Scripture book identification.

Syntax

- **USFM:** `\id` *code* *content*
- **USX:** `<book style="id" @code>`*content*`</book>`

code *

A standard 3-character scripture [book identifier](#).

Book IDs

This table lists the standard USFM/USX 3-character book identifiers.

Number	Identifier	English Name	Alternate Name/Notes
01	GEN	Genesis	‘1 Moses’ in some Bibles
02	EXO	Exodus	‘2 Moses’ in some Bibles
03	LEV	Leviticus	‘3 Moses’ in some Bibles
04	NUM	Numbers	‘4 Moses’ in some Bibles
05	DEU	Deuteronomy	‘5 Moses’ in some Bibles
06	JOS	Joshua	

Number	Identifier	English Name	Alternate Name/Notes
07	JDG	Judges	
08	RUT	Ruth	
09	1SA	1 Samuel	1 Kings or Kingdoms in Orthodox Bibles; do not confuse this abbreviation with ISA for Isaiah
10	2SA	2 Samuel	2 Kings or Kingdoms in Orthodox Bibles
11	1KI	1 Kings	3 Kings or Kingdoms in Orthodox Bibles
12	2KI	2 Kings	4 Kings or Kingdoms in Orthodox Bibles
13	1CH	1 Chronicles	1 Paralipomenon in Orthodox Bibles
14	2CH	2 Chronicles	2 Paralipomenon in Orthodox Bibles
15	EZR	Ezra	This is for Hebrew Ezra, sometimes called 1 Ezra or 1 Esdras; also for Ezra-Nehemiah when one book
16	NEH	Nehemiah	Sometimes appended to Ezra; called 2 Esdras in the Vulgate
17	EST	Esther (Hebrew)	This is for Hebrew Esther; for the longer Greek LXX Esther use ESG
18	JOB	Job	
19	PSA	Psalms	150 Psalms in Hebrew, 151 Psalms in Orthodox Bibles, 155 Psalms in West Syriac Bibles, if you put Psalm 151 separately in an Apocrypha use PS2, for Psalms 152-155 use PS3
20	PRO	Proverbs	31 Proverbs, but 24 Proverbs in the Ethiopian Bible
21	ECC	Ecclesiastes	Qoholeth in Catholic Bibles; for Ecclesiasticus use SIR
22	SNG	Song of Songs	Song of Solomon, or Canticles of Canticles in Catholic Bibles
23	ISA	Isaiah	Do not confuse this abbreviation with 1SA for 1 Samuel
24	JER	Jeremiah	The Book of Jeremiah; for the Letter of Jeremiah use LJE
25	LAM	Lamentations	The Lamentations of Jeremiah
26	EZK	Ezekiel	
27	DAN	Daniel (Hebrew)	This is for Hebrew Daniel; for the longer Greek LXX Daniel use DAG
28	HOS	Hosea	

Number	Identifier	English Name	Alternate Name/Notes
29	JOL	Joel	
30	AMO	Amos	
31	OBA	Obadiah	
32	JON	Jonah	Do not confuse this abbreviation with JHN for John
33	MIC	Micah	
34	NAM	Nahum	
35	HAB	Habakkuk	
36	ZEP	Zephaniah	
37	HAG	Haggai	
38	ZEC	Zechariah	
39	MAL	Malachi	
41	MAT	Matthew	The Gospel according to Matthew
42	MRK	Mark	The Gospel according to Mark
43	LUK	Luke	The Gospel according to Luke
44	JHN	John	The Gospel according to John
45	ACT	Acts	The Acts of the Apostles
46	ROM	Romans	The Letter of Paul to the Romans
47	1CO	1 Corinthians	The First Letter of Paul to the Corinthians
48	2CO	2 Corinthians	The Second Letter of Paul to the Corinthians
49	GAL	Galatians	The Letter of Paul to the Galatians
50	EPH	Ephesians	The Letter of Paul to the Ephesians
51	PHP	Philippians	The Letter of Paul to the Philippians
52	COL	Colossians	The Letter of Paul to the Colossians
53	1TH	1 Thessalonians	The First Letter of Paul to the Thessalonians
54	2TH	2 Thessalonians	The Second Letter of Paul to the Thessalonians
55	1TI	1 Timothy	The First Letter of Paul to Timothy
56	2TI	2 Timothy	The Second Letter of Paul to Timothy
57	TIT	Titus	The Letter of Paul to Titus
58	PHM	Philemon	The Letter of Paul to Philemon
59	HEB	Hebrews	The Letter to the Hebrews

Number	Identifier	English Name	Alternate Name/Notes
60	JAS	James	The Letter of James
61	1PE	1 Peter	The First Letter of Peter
62	2PE	2 Peter	The Second Letter of Peter
63	1JN	1 John	The First Letter of John
64	2JN	2 John	The Second Letter of John
65	3JN	3 John	The Third Letter of John
66	JUD	Jude	The Letter of Jude; do not confuse this abbreviation with JDG for Judges, or JDT for Judith
67	REV	Revelation	The Revelation to John; called Apocalypse in Catholic Bibles
68	TOB	Tobit	
69	JDT	Judith	
70	ESG	Esther Greek	
71	WIS	Wisdom of Solomon	
72	SIR	Sirach	Ecclesiasticus or Jesus son of Sirach
73	BAR	Baruch	5 chapters in Orthodox Bibles (LJE is separate); 6 chapters in Catholic Bibles (includes LJE); called 1 Baruch in Syriac Bibles
74	LJE	Letter of Jeremiah	Sometimes included in Baruch; called 'Rest of Jeremiah' in Ethiopia
75	S3Y	Song of the 3 Young Men	Includes the Prayer of Azariah; sometimes included in Greek Daniel
76	SUS	Susanna	Sometimes included in Greek Daniel
77	BEL	Bel and the Dragon	Sometimes included in Greek Daniel; called 'Rest of Daniel' in Ethiopia
78	1MA	1 Maccabees	Called '3 Maccabees' in some traditions, printed in Catholic and Orthodox Bibles
79	2MA	2 Maccabees	Called '1 Maccabees' in some traditions, printed in Catholic and Orthodox Bibles
80	3MA	3 Maccabees	Called '2 Maccabees' in some traditions, printed in Orthodox Bibles
81	4MA	4 Maccabees	In an appendix to the Greek Bible and in the Georgian Bible

Number	Identifier	English Name	Alternate Name/Notes
82	1ES	1 Esdras (Greek)	The 9 chapter book of Greek Ezra in the LXX, called ‘2 Esdras’ in Russian Bibles, and called ‘3 Esdras’ in the Vulgate; when Ezra-Nehemiah is one book use EZR
83	2ES	2 Esdras (Latin)	The 16 chapter book of Latin Esdras called ‘3 Esdras’ in Russian Bibles and called ‘4 Esdras’ in the Vulgate; for the 12 chapter Apocalypse of Ezra use EZA
84	MAN	Prayer of Manasseh	Sometimes appended to 2 Chronicles, included in Orthodox Bibles
85	PS2	Psalms 151	An additional Psalm in the Septuagint, appended to Psalms in Orthodox Bibles
86	ODA	Odae/Odes	A book in some editions of the Septuagint; Odes has different contents in Greek, Russian, and Syriac traditions
87	PSS	Psalms of Solomon	A book in some editions of the Septuagint, but not printed in modern Bibles
A4	EZA	Ezra Apocalypse	12 chapter book of Ezra Apocalypse; called ‘3 Ezra’ in the Armenian Bible, called ‘Ezra Shealtiel’ in the Ethiopian Bible; formerly called 4ES; called ‘2 Esdras’ when it includes 5 Ezra and 6 Ezra
A5	5EZ	5 Ezra	2 chapter Latin preface to Ezra Apocalypse; formerly called 5ES
A6	6EZ	6 Ezra	2 chapter Latin conclusion to Ezra Apocalypse; formerly called 6ES
B2	DAG	Daniel Greek	The 14 chapter version of Daniel from the Septuagint including Greek additions
B3	PS3	Psalms 152-155	Additional Psalms 152-155 found in West Syriac manuscripts
B4	2BA	2 Baruch (Apocalypse)	The Apocalypse of Baruch in Syriac Bibles
B5	LBA	Letter of Baruch	Sometimes appended to 2 Baruch; sometimes separate in Syriac Bibles
B6	JUB	Jubilees	Ancient Hebrew book used in the Ethiopian Bible
B7	ENO	Enoch	Sometimes called ‘1 Enoch’; ancient Hebrew book in the Ethiopian Bible

Number	Identifier	English Name	Alternate Name/Notes
B8	1MQ	1 Meqabyan/Mekabis	Book of Mekabis of Benjamin in the Ethiopian Bible
B9	2MQ	2 Meqabyan/Mekabis	Book of Mekabis of Moab in the Ethiopian Bible
C0	3MQ	3 Meqabyan/Mekabis	Book of Meqabyan in the Ethiopian Bible
C1	REP	Reproof	Proverbs part 2: Used in the Ethiopian Bible
C2	4BA	4 Baruch	Paralipomenon of Jeremiah, called ‘Rest of the Words of Baruch’ in Ethiopia; may include or exclude the Letter of Jeremiah as chapter 1, used in the Ethiopian Bible
C3	LAO	Letter to the Laodiceans	A Latin Vulgate book, found in the Vulgate and some medieval Catholic translations
A0	FRT	Front Matter	
A1	BAK	Back Matter	
A2	OTH	Other Matter	
A7	INT	Introduction Matter	
A8	CNC	Concordance	
A9	GLO	Glossary/Wordlist	
B0	TDX	Topical Index	
B1	NDX	Names Index

98	XXE	Extra material	
99	XXF	Extra material	
100	XXG	Extra material	

usfm - USFM version

Summary

Description

USFM version specification. Identifies the USFM version which an editor or processor must support to successfully handle markup within the file.

Syntax note

USX represents most USFM [paragraph](#) types as a `<para>` element. In the case of `\usfm`, the `version` number is related to the `version` attribute value for the USX root element `<usx>`.

See the [Document Structure](#) page for the syntax diagram highlighting the position of `usfm` - USFM version.

Syntax

- USFM: `\usfm version`
- USX: `<usx version="version">`

`version` *

USFM/USX version number.

- Beginning with USFM 3.1, the version the version number is required: `\usfm 3.1` or `<usx version="3.1">`

Chapters and Verses

Chapters and Verses as Milestones

A milestone type of markup is needed when a document has two or more structures that interact in a non-hierarchical manner – also referred to as overlapping or concurrent markup. The 2 primary overlapping structures in scripture text are:

1. The paragraph structures used to express the discourse/narrative of the text, and
2. The division of the text into books, chapters and verses.

In scripture texts encoded using USFM or USX, the paragraph level markup forms the main structure of the document, while chapter and verse elements are empty milestones which identify the location where chapters or verses begins and end.

- [c - Chapter number](#)
- [ca - Alternate chapter number](#)
- [cp - Published chapter number](#)
- [v - Verse number](#)
- [va - Alternate verse number](#)
- [vp - Published verse number](#)

c - Chapter number

Summary

Description

Chapter number.

Syntax

- USFM: `\c number \ca altnumber \ca*` (see: [ca - Alternate chapter number](#))
 - `\cp pubnumber` (see: [cp - Published chapter number](#))
- USX: `<chapter style="c" @number @altnumber @pubnumber @sid @eid/>`

number *

Chapter number

altnumber

Chapter number for an alternate versification scheme.

pubnumber

Published chapter character. The character(s) (number, letter, or both) which should be displayed in a published text, where it is different than the sequential chapter number

used within the translation editing environment.

sid *

Chapter start identifier. A standard book + chapter scripture reference. Book names must be a standard 3-character **book identifier**. *Required at chapter start milestone.*

- Pattern: `[A-Z1-4]{3} ?[0-9]+`

eid *

Chapter end identifier. A standard book + chapter scripture reference. Book names must be a standard 3-character **book identifier**. *Required at chapter end milestone.*

- Pattern: `[A-Z1-4]{3} ?[0-9]+`

Valid In

ca - Alternate chapter number

Summary

Description

Alternate chapter number. This is required when 2 versification traditions are identified in the same text. Used for providing and marking the chapter number used in the alternate versification scheme.

Syntax

- **USFM:** `\c number` (see: *c - Chapter number*) `\ca altnumber\ca*`
 - `\cp pubnumber` (see: *cp - Published chapter number*)
- **USX:** `<chapter style="c" @number @altnumber @pubnumber @sid @eid/>`

number *

Chapter number

altnumber

Chapter number for an alternate versification scheme.

pubnumber

Published chapter character. The character(s) (number, letter, or both) which should be displayed in a published text, where it is different than the sequential chapter number used within the translation editing environment.

sid *

Chapter start identifier. A standard book + chapter scripture reference. Book names must be a standard 3-character [book identifier](#). *Required at chapter start milestone.*

- Pattern: `[A-Z1-4]{3} ?[0-9]+`

eid *

Chapter end identifier. A standard book + chapter scripture reference. Book names must be a standard 3-character [book identifier](#). *Required at chapter end milestone.*

- Pattern: `[A-Z1-4]{3} ?[0-9]+`

rem - Remarks

Summary

Description

Remarks/comments. For adding brief comments by a translator, consultant, or supporter. This content is not a type of footnote, and is not intended for publication. When [rem - Remarks](#) is used, it is often found at the top of a file together with other [identification](#) content. However, [rem - Remarks](#) can be used for adding non-publishable remarks/comments anywhere within a text.

Adding names of individuals, initials, or other personal information directly within scripture text files is strongly discouraged.

toca# - Alternate book name texts

Summary

Description

Alternate language book name texts. Used to specify an alternate set of books name texts in a language of wider communication.

- The variable # (1-3) represents the book name form.
 - **toca1** - Long book name.
 - **toca2** - Short book name.
 - **toca3** - Book abbreviation.

Syntax

- **USFM:** \toca# **content**
- **USX:** <para style="toca#">**content**</para>

The Gospel according to

MATTHEW

Introduction

The Gospel according to Matthew tells the good news that Jesus is the Savior, the one through whom God fulfilled the promises he made in the Old Testament. This good news is not only for the Jewish people to whom it was born and lived, but for the whole world.

Example 72. Introduction to Mark (Good News Study Bible)

```
\id MRK
\ip However, he is more than a teacher, healer, or \w miracle\w*-worker. He is
also the Messiah, the Son of God, the Son of Man. These three titles express
the first Christians' understanding of who Jesus is.
\ili1 1 \k The Messiah\k* is the one promised by God, the one who would come
and
free God's people. By the time \bk The Gospel of Mark\bk* appeared, the title
" Messiah" (in Greek, "\w christ\w*") had become a proper name, so that the
Gospel opens with "the Good News about Jesus Christ" (and not "Jesus the
Christ"). Peter's confession (8.29) marks a turning-point in the ministry of
Jesus. The title "\w son of david\w* " (10.46-48) also identifies Jesus as the
Messiah, who would restore to Israel the power and glory it enjoyed under
David's reign (also 12.35-37).
\ili1 2 \k The Son of God\k* is the title by which the heavenly voice
```

addresses

Jesus at his baptism (1.11) and his transfiguration (9.7). And at Jesus' death the Roman officer confesses that Jesus is the Son of God (15.39).

\ili1 3 \k The Son of Man\k* is the title most often used of Jesus, and it appears only on the lips of Jesus. This enigmatic title appears in \bk The Book of Daniel\bk* (Dan 7.13n), where it is applied to the exalted figure to whom God gives universal dominion. In \bk Mark\bk* the title is used of Jesus in three ways: the Son of Man acts with divine power (2.10, 28); he will be rejected, will suffer and die (8.31; 9.9, 12, 31; 10.33-34, 45; 14.21, 41); he will return in power and glory (8.38; 13.26; 14.62).

cl - Chapter label

Summary

Description

Chapter label text.

Usage note

If **cl** is added to a text once *before* **chapter 1** it represents the label text for “Chapter” to be used throughout the current book. If **cl** is used *after each* individual **chapter**, it represents the specific label text to be used for the display of the current chapter (e.g. if numbers are being presented as words, not numerals).

Psalm 1

True Happiness

Happy are those
 who reject the advice of evil people,
 who do not follow the example
 of sinners
 or join those who have no use
 for God.

sd# - Semantic division

Summary

Description

Semantic division. Use to identify the location of vertical space intended to divide the text into structural or hierarchical sections. The purpose of **sd** is distinct from **b - Blank line** which is *primarily* used to denote whitespace at poetic stanza breaks.

- The variable **#** (1-4) represents the level of division being marked.

Syntax

- **USFM:** \sd#
- **USX:** <para style="sd#"/>

Style Type

Paragraph

```

In this layout design, chapter and verse numbers are suppressed, and new sections begin with drop capital.

“Once again, the kingdom of heaven is like a net that was let down into the lake and caught all kinds of fish. When it was full, the fishermen pulled it up on the shore. Then they sat down and collected the good fish in baskets, but threw the bad away. This is how it will be at the end of the age. The angels will come and separate the wicked from the righteous and throw them into the fiery furnace, where there will be weeping and gnashing of teeth.

“Have you understood all these things?” Jesus asked.

“Yes,” they replied.

He said to them, “Therefore every teacher of the law who has been instructed about the kingdom of heaven is like the owner of a house who brings out of his storeroom new treasures as well as old.”

When Jesus had finished these parables, he moved on from there. Coming to his hometown, he began teaching the people in their synagogue, and they were amazed. “Where did this man get this wisdom and these miraculous powers?” they asked. “Isn’t this the carpenter’s son? Isn’t his mother’s name Mary, and aren’t his brothers James, Joseph, Simon and Judas? Aren’t all his sisters with us? Where then did this man get all these things?” And they took offense at him.

But Jesus said to them, “Only in his hometown and in his own house is a prophet without honor.”

And he did not do many miracles there because of their lack of faith.

1 From Paul, a servant of Christ Jesus and an apostle chosen and called by God to preach his Good News.

²The Good News was promised long ago by God through his prophets, as written in the Holy Scriptures. ³It is about his Son, our Lord Jesus Christ: as to his humanity, he was born a descendant of David; ⁴as to his divine holiness, he was shown with great power to be the Son of God by being raised from death. ⁵Through him God gave me the privilege of being an apostle for the sake of Christ, in order to lead people of all nations to believe and obey. ⁶This also includes you

who are in Rome, whom God has called to belong to Jesus Christ.

⁷And so I write to all of you in Rome whom God loves and has called to be his own people:

May God our Father and the Lord Jesus Christ give you grace and peace.

Prayer of Thanksgiving

⁸First, I thank my God through Jesus Christ for all of you, because the whole world is hearing about your faith. ⁹God is my witness that what I say is true—the God whom I serve with all my heart by preaching

A Letter to Gentiles Who Had Faith in the Lord

²²The apostles, the leaders, and all the church members decided to send some men to Antioch along with Paul and Barnabas. They chose Silas and Judas Barsabbas,^g who were two leaders of the Lord's followers. ²³They wrote a letter that said:

We apostles and leaders send friendly greetings to all of you Gentiles who are followers of the Lord in Antioch, Syria, and Cilicia.

²⁴We have heard that some people from here have terribly upset you by what they said. But we did not send

\p ...
\s1 Jesus Explains the Story about the Weeds
\p
\v 36 After Jesus left the crowd and went inside, his disciples came to him
and said, "Explain to us the story about the weeds in the wheat field."
\p
\v 37 Jesus answered:
\pi The one who scattered the good seed is the Son of Man.
\v 38 The field is the world, and the good seeds are the people who belong to
the kingdom. The weed seeds are those who belong to the evil one,
\v 39 and the one who scattered them is the devil. The harvest is the end of
time, and angels are the ones who bring in the harvest.
```

Jesus Explains the Story about the Weeds

³⁶After Jesus left the crowd and went inside,³⁷ his disciples came to him and said, “Explain to us the story about the weeds in the wheat field.”

³⁷Jesus answered:

The one who scattered the good seed is the Son of Man. ³⁸The field is the world, and the good seeds are the people who belong to the kingdom. The weed seeds are those who belong to the evil one, ³⁹and the one who scattered them is the devil. The harvest is the end of time, and angels are the ones who bring in the harvest.

Psalm 3

Morning Prayer for Help^c

I have so many enemies, LORD,
so many who turn against me!

² They talk about me and say,
“God will not help him.”

³ But you, O LORD, are always my
shield from danger;
you give me victory
and restore my courage.

⁴ I call to the LORD for help,
and from his sacred hill^d he
answers me.

⁵ I lie down and sleep,
and all night long the LORD
protects me.

```

¹⁸ Praise the LORD, the God of Israel!

He alone does these wonderful
things.

¹⁹ Praise his glorious name forever!

May his glory fill the whole world.

Amen! Amen!

²⁰ This is the end of the prayers of
David son of Jesse.

Psalm 3

Morning Prayer for Help^c

I have so many enemies, LORD,
so many who turn against me!

² They talk about me and say,
“God will not help him.”

³ But you, O LORD, are always my
shield from danger;
you give me victory
and restore my courage.

⁴ I call to the LORD for help,
and from his sacred hill^d he
answers me.

⁵ I lie down and sleep,
and all night long the LORD
protects me.

Example 227. Nehemiah 7.4-25 (NIV)

```
\id NEH
\c 7
\s1 The List of the Exiles Who Returned
\p
\v 4 Now the city was large and spacious, but there were few people in it,
and the houses had not yet been rebuilt.
\v 5 So my God put it into my heart to assemble the nobles, the officials
and the common people for registration by families. I found the genealogical
record of those who had been the first to return. This is what I found written
there:
\b
\pm
\v 6 These are the people of the province who came up from the captivity of
the exiles whom Nebuchadnezzar king of Babylon had taken captive (they returned
to Jerusalem and Judah, each to his own town,
\v 7 in company with Zerubbabel, Jeshua, Nehemiah, Azariah, Raamiah, Nahamani,
Mordecai, Bilshan, Mispereth, Bigvai, Nehum and Baanah):
\b
\pm The list of the men of Israel:
\b
\lim1
\v 8 the descendants of Parosh - 2,172
\lim1
\v 9 of Shephatiah - 372
\lim1
```

```

\v 10 of Arah - 652
\lim1
\v 11 of Pahath-Moab (through the line of Jeshua and Joab) - 2,818
\lim1
\v 12 of Elam - 1,254
\lim1
\v 13 of Zattu - 845
\lim1
\v 14 of Zaccai - 760
...

```

The List of the Exiles Who Returned

⁴Now the city was large and spacious, but there were few people in it, and the houses had not yet been rebuilt. ⁵So my God put it into my heart to assemble the nobles, the officials and the common people for registration by families. I found the genealogical record of those who had been the first to return. This is what I found written there:

⁶These are the people of the province who came up from the captivity of the exiles whom Nebuchadnezzar king of Babylon had taken captive (they returned to Jerusalem and Judah, each to his own town, ⁷in company with Zerubbabel, Jeshua, Nehemiah, Azariah, Raamiah, Nahamani, Mordecai, Bilshan, Mispereth, Bigvai, Nehum and Baanah):

The list of the men of Israel:

- ⁸ the descendants of Parosh - 2,172
- ⁹ of Shephatiah - 372
- ¹⁰ of Arah - 652
- ¹¹ of Pahath-Moab (through the line of Jeshua and Joab) - 2,818
- ¹² of Elam - 1,254
- ¹³ of Zattu - 845
- ¹⁴ of Zaccai - 760
- ¹⁵ of Binnui - 648
- ¹⁶ of Bebai - 628
- ¹⁷ of Azgad - 2,322
- ¹⁸ of Adonikam - 667
- ¹⁹ of Bigvai - 2,067
- ²⁰ of Adin - 655
- ²¹ of Ater (through Hezekiah) - 98
- ²² of Hashum - 328
- ²³ of Bezai - 324
- ²⁴ of Hariph - 112
- ²⁵ of Gibeon - 95

TextProperties

paragraph, publishable, vernacular

Publication Issues

- Commonly formatted using a hanging indent (out-dented).

Tables

- [tr](#) - Table row

Alternate structures for tables in USFM and USX

In **USFM**, a table is composed by a series of paragraphs marked with `\tr`.

- [tr](#) - Table row

The content for cells is marked with [character types for tables](#).

- [th#](#) - Table column head
- [thr#](#) - Table column head - right aligned
- [tc#](#) - Table cell
- [tcr#](#) - Table cell - right aligned
- [tcc#](#) - Table cell - center aligned

USX represents most USFM [paragraph](#) and [character](#) types with corresponding `<para>` and `<char>` tags. For tables, the structures are different. In **USX** the sequence of `\tr` rows is composed within a `<table>...</table>` container.

USFM

Example 230. USFM table structure

```
\tr \tc1 {cell 1 content} \tc2 {cell 2 content}  
\tr \tc1 {cell 3 content} \tc2 {cell 4 content}
```

USX

Example 231. USX table structure

```
<table>  
  <row>  
    <cell style="[char@style]" align="start">{cell 1 content}</cell>  
    <cell style="[char@style]" align="start">{cell 2 content}</cell>  
  </row>  
  <row>  
    <cell style="[char@style]" align="start">{cell 3 content}</cell>  
    <cell style="[char@style]" align="start">{cell 4 content}</cell>  
  </row>  
</table>
```

 - `tcc#` - Table cell - center aligned

tr - Table row

Summary

Description

Table row start.

Syntax notes

In USFM, a table is composed by a series of paragraphs marked with `\tr`. In USX the sequence of `\tr` rows is composed within a `<table>...</table>` container. See [Tables](#).

Syntax

- USFM: `\tr content`
- USX: `<table><row style="tr" @vid>content</row>...</table>`

vid

Required to re-identify the current verse whenever the previous [paragraph](#) or [table](#) closed prior the end of the current verse text. A standard book + chapter + verse scripture reference. Book names must be a standard 3-character [book identifier](#). Chapter:verse separator is always a colon `:`.

- Pattern: `[A-Z1-4]{3} ?[a-z0-9\-.:]*`

content

[Tables](#).

Attributes

USFM and USX 3 provide a syntax for adding named attributes to character markers. Attributes define additional properties for the marked content, and are a means of extending the meta-information contained within in a text. USFM *formally* defines attributes for a [selected set](#) of current [character](#) types.

General Syntax

In USFM, within a character marker span an attributes list is separated from the text content by a vertical bar |. Attributes are listed as pairs of name + corresponding value using the syntax: **attribute="value"**. The attribute name is a single ASCII string. The value is wrapped in quotes.

In USX, attributes are applied to elements in the standard XML syntax: **attribute="value"**.

USFM

Example 232. Glossary word with lemma attribute

```
\w gracious|lemma="grace"\w*
```

USX

Example 233. Glossary word with lemma attribute

```
<char style="w" lemma="grace">gracious</char>
```

USJ

Example 234. Glossary word with lemma attribute

```
{  
  "type": "char",  
  "marker": "w",  
  "lemma": "grace",  
  "content": ["gracious"]  
}
```

Nearly all USX elements contain a required **style** attribute. For `<para>` and `<char>` elements, the **style** attribute defines the **paragraph** or **character** type.

Default Attribute

In USFM, when content is supplied in the position of an attribute, but without an explicit attribute name, the specification defines a single default. This allows a commonly used attribute (the default) to be added with as little additional markup in the text as possible.

The concept of a "default attribute" is only valid in USFM. **In USX**, attributes always need to be expressed fully as **attribute="value"** together.

USFM

Example 235. Glossary word with un-named default lemma attribute

```
\w gracious|grace\w*
```

USX

Example 236. USX: Glossary word with lemma attribute

```
<char style="w" lemma="grace">gracious</char>
```

USJ

Example 237. USX: Glossary word with lemma attribute

```
{  
  "type": "char",  
  "marker": "w",  
  "lemma": "grace",  
  "content": ["gracious"]  
}
```

Multiple Attribute Values

In cases where more than one value is needed for an attribute key, use a comma separated list within the value string. Whitespace adjacent to the comma separators is ignored.

USFM

Example 238. Glossary word with multiple strong values

```
\w gracious|strong="H1234,G5485"\w*
```

USX

Example 239. Glossary word with multiple strong values

```
<char style="w" strong="H1234,G5485">gracious</char>
```

USJ

Example 240. Glossary word with multiple strong values

```
{  
  "type": "char",  
  "marker": "w",  
  "strong": "H1234,G5485",  
  "content": ["gracious"]  
}
```

See the attributes for [wordlist/glossary entry](#) for other examples.

Multiple Attribute Parts

In cases where an attribute value is composed of multiple parts (e.g. a compound word or phrase), separate the parts using a colon `:` within the value string.

See the `gloss` attribute for [ruby glosses](#) for an example of the use of this syntax.

Backward Compatibility

Pre-existing markers which formally provide attributes in USFM/USX 3 (or newer) may continue to be used without attributes. `\w gracious\w*` (no attributes) and `<char style="w">gracious</char>` remain valid.

User Defined Attributes

Using the general syntax above, attributes may be added to any character markers beyond the formalized set in the current version of the USFM/USX specification. These will not be considered canonical, and software supporting USFM/USX is not required to process user-defined attributes.

User defined attributes must begin with the prefix `x-`.

USFM

Example 241. Glossary word with user defined attribute

```
\w gracious|x-myattr="value"\w*  
  
\w gracious|lemma="grace" x-myattr="value"\w*
```

USX

Example 242. Glossary word with user defined attribute

```
<char style="w" x-myattr="value">gracious</char>  
  
<char style="w" lemma="grace" x-myattr="value">gracious</char>
```

USJ

Example 243. Glossary word with user defined attribute

```
{  
  "type": "char",  
  "marker": "w",  
  "x-myattr": "value",  
  "content": ["gracious"]  
}  
  
{  
  "type": "char",  
  "marker": "w",  
  "lemma": "grace",  
  "x-myattr": "value",  
  "content": ["gracious"]  
}
```

Characters Types with Attributes

- `jmp` - Link text — `href`, `title`, `id`
- `rb` - Ruby gloss — `gloss`
- `w` - Wordlist entry — `lemma`, `strong`, `srcloc`
- `ref` - Scripture reference(s) — `loc`, `gen`
- `fig` - Figure — `alt`, `src`, `size`, `loc`, `copy`, `ref`

Nesting

Background

Character level markup is applied to a span of text within a paragraph block. Sometimes, marking texts in a semantically accurate way requires nesting a character level element within another character level element. In these situations an editor, processor, or publishing system must be able to interpret the nested markup contexts correctly.

Initially, USFM did not allow character styles to be nested. Whenever a new character style was encountered in a paragraph the currently active character style was implicitly closed. However, it is a common occurrence for text within footnote sections, a footnote quotation (`fq` - Translation quote), keyword (`fk` - Keyword), or the footnote text (`ft` - Note text) to contain some text that needs to be marked. With the character styles being implicitly closed, a new way of marking nesting was needed and the plus sign `+` was used as a prefix to the opening and closing forms of a nested marker pair.

With USFM 3.1, the ending character marker has been made required — except for the markers used to start sections in footnotes and cross references (the note's 'structural elements'). This allows nesting to be done without the use of the plus sign. For backward compatibility, the use of the plus sign will still be processed as it has been.

In the following example text:

- `\nd` indicates to start a new character element nested inside the existing `\add` element (without closing `\add`)
- `\nd*` indicates the end of the nested environment without closing `\add`

USFM

```
\p The following is a \add translator's addition containing the  
word \nd Lord\nd* within it\add* ...
```

USX

```
<para style="p">The following is a <char style="add">translator's addition  
containing the word <char style="nd">Lord</char> within it</char> ...</para>
```

USJ

```
{
  "type": "para",
  "marker": "p",
  "content": [
    "The following is a",
    {
      "type": "char",
      "marker": "add",
      "content": [
        "translator's addition containing the word",
        {
          "type": "char",
          "marker": "nd",
          "content": ["Lord"]
        },
        " within it"
      ]
    },
    "... "
  ]
}
```

Multiple levels of nesting can occur.

In USX, nested elements occur in XML without requiring any additional syntax.

Examples

USFM

Example 244. Numbers 21.14 (GNT) - bk + nd nested

```
\v 14 That is why \bk The Book of the \nd Lord\nd*'s Battles\bk* speaks of
...the town of Waheb in the area of Suphah, and the valleys; the Arnon River,
```

USX

Example 245. Numbers 21.14 (GNT) - bk + nd nested

```
<para style="p">...<verse number="14" style="v" sid="NUM 21:14"/>That is why
<char
  style="bk">The Book of the <char style="nd">Lord</char>'s Battles</char>
speaks of ...the town of Waheb in the area of Suphah, and the valleys; the
Arnon River, <verse eid="NUM 22:14"/></para>
```

USJ

```
{
  "type": "para",
  "marker": "p",
  "content": [
    "...",
    {
      "type": "verse",
      "marker": "v",
      "number": "14",
      "sid": "NUM 21:14"
    },
    "That is why ",
    {
      "type": "char",
      "marker": "bk",
      "content": [
        "The Book of the",
        {
          "type": "char",
          "marker": "nd",
          "content": ["Lord"]
        },
        "'s Battles"
      ]
    },
    " speaks of ...the town of Waheb in the area of Suphah, and the valleys;
    the Arnon River, "
  ]
}
```

From Mount Hor to the Valley of the Moabites

¹⁰The Israelites moved on and camped at Oboth. ¹¹After leaving that place, they camped at the ruins of Abarim in the wilderness east of Moabite territory. ¹²Then they camped in Zered Valley. ¹³From there they moved again and camped on the north side of the Arnon River, in the wilderness which extends into Amorite territory. (The Arnon was the border between the Moabites and the Amorites.) ¹⁴That is why *The Book of the LORD's Battles* speaks of "...the town of Waheb in the area of Suphah, and the valleys; the Arnon River, ¹⁵and the slope of the valleys that extend to the town of Ar and toward the border of Moab."

USFM

Example 247. Genesis 2.4 (GNT) - fk and ft + nd nested

```
\p When the \nd Lord\nd* \f + \fr 2.4: \fk the \nd Lord\nd*: \ft Where the  
Hebrew text has Yahweh, traditionally transliterated as Jehovah, this  
translation employs \nd Lord\nd* with capital letters, following a usage  
which is widespread in English versions.\f* God made the universe,  
...
```

USX

Example 248. Genesis 2.4 (GNT) - fk and ft + nd nested

```
<para style="p" vid="GEN 2:4">When the <char style="nd">Lord</char>  
<note caller="+" style="f">  
  <char style="fr" closed="false">2.4: </char>  
  <char style="fk" closed="false">the  
    <char style="nd">Lord</char>:  
  </char>  
  <char style="ft" closed="false">Where the Hebrew text has Yahweh,  
  traditionally transliterated as Jehovah, this translation employs  
    <char style="nd">Lord</char> with capital letters, following a usage  
    which is widespread in English versions.  
  </char>  
</note> God made the universe, <verse eid="GEN 2:4" />
```

USJ

Example 249. Genesis 2.4 (GNT) - fk and ft + nd nested

```
{  
  "type": "USJ",  
  "marker": "p",  
  "content": [  
    "When the",  
    {  
      "type": "char",  
      "marker": "nd",  
      "content": ["Lord"]  
    },  
    {  
      "type": "note",  
      "marker": "f",  
      "caller": "+",  
      "content": [  
        {  
          "type": "char",  
          "marker": "fr",  
          "content": ["2.4:"]  
        },  
        ]  
    },  
  ],  
}
```

```

{
  "type": "char",
  "marker": "fk",
  "content": [
    "the",
    {

THE ACTS

of the Apostles

Introduction

The Acts of the Apostles is a continuation of *The Gospel according to Luke*. Its chief purpose is to tell how Jesus' early followers, led by the Holy Spirit, spread the Good News about him “in Jerusalem, in all of Judea and Samaria, and to the ends of the earth” (1.8). It is the story of

jmp - Link text

Summary

Description

Link text. For associating linking attributes to a span of text.

Syntax

- USFM: \jmp **content** | **@href @title @id** \jmp*
- USX: <char style="jmp" **@href @title @id**>**content**</char>

href

Identifies the resource being linked to as a URI. (*default attribute*)

- A user-defined URI prefix can be used to help identify the target resource. For example: **x-prj**: might identify another scripture translation project available within the current editing environment, like **x-prj:RSV52 MAT 3:1-4**.
- User defined URI prefixes must begin with the prefix **x-**.
- When an **href** specifies a scripture reference, follow the pattern: **[A-Z1-4]{3}(-[A-Z1-4]{3})? ?[a-z0-9\-.:]***. Example: **MAT 3:1-4**, where:
 - Book names is a standard 3-character scripture **book identifier**.
 - The chapter + verse separator is a colon **:**.
 - Verse ranges are indicated using a hyphen.

title

Plain text describing the resource being linked to (for example - to display in a tooltip when hovering over the link).

id

A unique identifier for a specific content location (i.e. an anchor).

Style Type

Character

Valid In

[BookTitles], **[BookIntroduction]**, **[BookIntroductionEndTitles]**, **[Section]**, **[Para]** (**Body Paragraphs**, **Poetry**), **[List]**, **[Table]**

k - Keyword/keyterm

Summary

Description

Keyword/keyterm.

Syntax

- USFM: \k **content** | **@key** \k*
- USX: <char style="k" **@key**>**content**</char>

key

A simplified identifier for the keyword. This is useful for digital publications where links to a keyword in a glossary cannot point to texts with special characters (e.g.ääö) or spaces. Also useful to support a glossary where a single glossary entry is represented by more than one surface word. Each keyword surface form can be identified with the same key.

The Preaching of John the Baptist

(Matthew 3.1-12; Luke 3.1-18; John 1.19-28)

1 This is the Good News about Jesus Christ, the Son of God.^a ²It began as the prophet Isaiah had written:

*“God said, ‘I will send my messenger ahead of you to open the way for you.’
³Someone is shouting in the desert, ‘Get the road ready for the Lord; make a straight path for him to travel!’”*

rb - Ruby gloss

About Ruby

See: <https://www.w3.org/TR/ruby/>

Han characters: Chinese, Japanese, and Korean texts have some characters that they share in common. In Japanese these are called Kanji (literally “Han characters”). There are several thousand of these characters to learn. For new readers or readers new to the Biblical texts it may be very difficult for them to recognize what Chinese or Japanese word corresponds to the Han character(s) they are seeing.

Ruby glosses: In order to help these readers, some Bibles are printed with glosses using small phonetic characters (e.g. Japanese uses the hiragana alphabet) placed above the more symbolic Han characters to tell the reader how to pronounce the

character. These phonetic characters are generically called “ruby glosses” or “rubies”. In Japanese this technique is called Furigana.

Summary

Description

Ruby gloss. Used to annotate the base text with ruby characters.

Syntax

- **USFM:** `\rb content | @gloss \rb*`
- **USX:** `<char style="rb" @gloss>content</char>`

gloss

Ruby gloss characters (*default attribute*)

- If the base text being glossed (B) is a *phrase* of multiple Han characters, then the ruby gloss text (gg) may contain multiple elements, one for glossing each of the base text characters making up the phrase. Use a colon : to separate multiple glossing characters. Parts of a phrase gloss may be left empty. Example: `\rb BB|"gg:gg"\rb*` or `\rb BBBB|gg1::gg3:\rb*`.

```

The Greatness of God's Son

⁴The Son was made greater than the angels, just as the name that God gave him is greater than theirs. ⁵For God never said to any of his angels,

“You are my Son;
today I have become your Father.”

Psa 2.7

Nor did God say about any angel,

“I will be his Father,
and he will be my Son.”

2Sa 7.14; 1Ch 17.13

ref - Scripture reference

Summary

Description

Scripture reference. For marking scripture references, with an optional machine-readable target location.

Syntax

- USFM: \ref *content* | @loc \ref*
- USX: <ref @loc @gen> *content* </char>

loc

Use for explicitly identifying the target scripture reference. (*default attribute*)

- Follows the pattern: `[A-Z1-4]{3}(-[A-Z1-4]{3})? ?[a-z0-9\-\:]*`.
- Example: `MAT 3:1-4`, where:
 - Book names is a standard 3-character scripture [book identifier](#).
 - The chapter + verse separator is a colon `:`.
 - Verse ranges are indicated using a hyphen.

gen

Set the value to `true` to indicate that a `<ref>` tag was auto-generated. Auto-generated tags can be stripped from USFM texts converted from USX.

Valid In

`[BookTitles]`, `[BookIntroduction]`, `[BookIntroductionEndTitles]`, `[Section]`, `[Para]` (`Body Paragraphs`, `Poetry`), `[List]`, `[Table]`, `[Footnote]`, `[CrossReference]`

Added

The Death of Jesus

(Mark 15.33-41; Luke 23.44-49; John 19.28-30)

⁴⁵At noon the whole country was covered with darkness, which lasted for three hours. ⁴⁶At about three o'clock Jesus cried out with a loud shout, "Eli, Eli, lema sabachthani?" which means, "My God, my God, why did you abandon me?"

w - Wordlist entry

Summary

Description

Wordlist / glossary / dictionary entry. Surround a word or phrase with this markup to indicate that it should appear in the glossary.

Syntax

- USFM: \w **content** | **@lemma @strong @srcloc** \w*
- USX: <char style="w" **@lemma @strong @srcloc**>**content**</char>

lemma

Citation form for the term in the glossary (*default attribute*)

strong

Strong's ID in the form **H####** (Hebrew) or **G####** (Greek)

- A strong's ID augmentation identifier, if required, should be separated from the strong value by a colon **:**. An augmentation is a method of extending Strong's by aligning it to another lexicon (e.g. Brown-Driver-Briggs). This requires dividing some words into two or more separate words.
- There are instances where more than one word may need to be included within **w - Wordlist entry** because of how Hebrew and Greek use word repetitions (e.g. for a superlative). Exodus 29:37 repeats the word 'holy' as the superlative form.

srcloc

Location of the word in the source text; Example: GNT version 5 text, book 51, chapter 1, verse 2, word 1.

Style Type

Character

Tables

- [th#](#) - Table column head
- [thr#](#) - Table column head - right aligned
- [tc#](#) - Table cell
- [tcr#](#) - Table cell - right aligned
- [tcc#](#) - Table cell - center aligned

See the information on [alternate structures for tables in USFM and USX](#).

th# - Table column head

Summary

Description

Table column heading cell.

- The variable # represents the table column number.

Syntax notes

In **USFM**, a table is composed by a series of paragraphs marked with `\tr`. The content for cells is marked with [character types for tables](#), such as `\th#`.

In **USX** the sequence of `\tr` rows is composed within a `<table>...</table>` containing `<row>`'s and `<cell>`'s. See [Paragraphs > Tables](#).

Syntax

- **USFM:** `\th# content`
 - Use a dash - between a range of column numbers to indicate that the columns should be spanned. Example: `\th1-2`

- **USX:** `<cell style="th#" @colspan @align>content</cell>`

colspan

Column spanning is indicated with an optional `colspan` attribute. Example: `<cell style="th1" colspan="2" align="start">`

align

Cell alignment = `start` | `center` | `end`. Represents 'left', 'center', and 'right' respectively in left-to-right direction texts, and 'right', 'center', 'left' in right-to-left direction texts.

thr# - Table column head - right aligned

Summary

Description

Table column heading cell - right aligned.

- The variable **#** represents the table column number.

Syntax notes

In **USFM**, a table is composed by a series of paragraphs marked with `\tr`. The content for cells is marked with [character types for tables](#), such as `\th#`.

In **USX** the sequence of `\tr` rows is composed within a `<table>...</table>` containing `<row>`'s and `<cell>`'s. See [Paragraphs > Tables](#).

Syntax

- **USFM:** `\thr# content`
 - Use a dash - between a range of column numbers to indicate that the columns should be spanned. Example: `\thr1-2`
- **USX:** `<cell style="thr#" @colspan @align>content</cell>`

colspan.

Column spanning is indicated with an optional **colspan** attribute. Example: `<cell`

`style="thr1" colspan="2" align="start">`

align

Cell alignment = `start` | `center` | `end`. Represents 'left', 'center', and 'right' respectively in left-to-right direction texts, and 'right', 'center', 'left' in right-to-left direction texts.

tcc# - Table cell - center aligned

Summary

Description

Table cell - center aligned.

- The variable **#** represents the table column number.

Syntax notes

In **USFM**, a table is composed by a series of paragraphs marked with `\tr`. The content for cells is marked with [character types for tables](#), such as `\th#`.

In **USX** the sequence of `\tr` rows is composed within a `<table>...</table>` containing `<row>`'s and `<cell>`'s. See [Paragraphs > Tables](#).

Syntax

- **USFM:** `\tcc# content`
 - Use a dash - between a range of column numbers to indicate that the columns should be spanned. Example: `\tcc1-2`

- **USX:** `<cell style="tcc#" @colspan @align>content</cell>`

colspan

Column spanning is indicated with an optional **colspan** attribute. Example: `<cell style="tcc1" colspan="2" align="start">`

align

Cell alignment = **start** | **center** | **end**. Represents 'left', 'center', and 'right' respectively in left-to-right direction texts, and 'right', 'center', 'left' in right-to-left direction texts.

fw - Witness list

Summary

Description

Footnote - Witness list. For distinguishing a list of sigla representing witnesses in critical editions.

Syntax

- **USFM:** \fw **content**
- **USX:** <char style="fw">**content**</char>

Style Type

Character

Valid In

[Footnote]

Added

3.0

Apparatus entries of printed critical editions are densely packed with information. One key part is the list of witnesses supporting a specific reading. The witnesses are usually represented by sigla consisting of one character, an abbreviation, or a number. It can be very helpful to distinguish witness lists from other footnote text, which can make it simpler to introduce checking tools for these lists, and to create linking and reader helps in digital representations.

xop - Published origin text

Summary

Description

[Cross Reference](#) - Published origin text. In some cases the text to be published in the position of the cross reference origin ([xo - Origin reference](#)) does not follow the usual chapter, verse pattern. A standard origin reference following this pattern is required for validation of the cross reference location. [xop - Published origin text](#) can be used to supply the content intended for publishing, which is similar to the application of [cp] (published chapter character) and [vp] (published verse character).

Milestones

Summary

Description

Milestone marker.

Syntax

- USFM: `\style\*`
- USX: `<ms style="style"/>`

style *

Milestone type

- qt# - Quotations
- ts - Translator's section

Diagrams

USFM

USX

Background

Markup for identifying milestones is needed when documents have multiple structures that interact in a non-hierarchical manner. This is also referred to as 'overlapping' or 'concurrent' markup. A key example of the overlapping structures in scripture text are

1. Paragraphs used to structure the discourse/narrative of the text and
2. The division of the text into books, chapters and verses.

In USFM or USX texts, markup identifying paragraph level containers forms the main structure of the document, while [chapter](#) and [verse](#) markers are effectively milestones.

Another overlapping structure is encountered when identifying the start and end of the words of individual speakers within the text, which will regularly cross paragraph boundaries.

Basic Syntax

In USFM, milestones follow a syntax similar to [character level markup](#), but using a unique self-closing syntax. This specific syntax identifies the marker as a milestone. Milestones can mark a single position within the text, or the positions of the start or end of a span of text.

Self-closing markup is indicated by immediately terminating the marker, and any attributes, with a second backslash plus asterisk `\*`.

In USX, a milestone is expressed using the `<ms>` element.

Indicating Start and End Milestones

A milestone marker may end with either `-s` or `-e`

- `-s` indicates that the milestone is for marking the start of a span of text.
- `-e` indicates that the marker is an end milestone.

USFM

Example 466. USFM: Milestones for the start and end of a quotation/speaker

```
\qt1-s\*  
...  
\qt1-e\*
```

USX

Example 467. USX: Milestone for the start of a quotation/speaker

```
<ms style="qt1-s"/>  
...  
<ms style="qt1-e"/>
```

Standalone Milestones

This syntax can also be used for standalone milestones, not using start `-s` and end `-e` suffixes.

USFM

Example 468. USFM: Standalone milestone (*z namespace in this example*)

```
\zms\*
```

USX

Example 469. USX: Standalone milestone

```
<ms style="zms"/>
```

USFM or USX do not currently define any standalone milestones. This may change with future updates, as specific needs are identified.

Attributes

Attributes may be available for or required by a specific milestone type. For example: the **@who** attribute for the **qt** milestone.

Levels

As with other USFM/USX numbered marker types, a numeric variable may be added to a milestone marker to indicate a relative weighting or level. In the example above of the quotation/speaker milestone, a numbered version of the marker may be used to indicate the level of nesting of the quotation being marked (i.e. a quote within a quote).

The unnumbered version may be used when only one level of marker exists within the project text. Numbers should always be included when more than one level of the marker exists within the project text.

qt# - Quotations

Summary

Description

Quotation start and end milestones. Typically used for indicating the speaker of the text.

- The variable **#** (1-5) represents the level of nesting of the quotation being marked (i.e. a quote within a quote).

Syntax

- **USFM:** `\qt#-s | @sid @who\* / \qt#-e | @eid\*`
- **USX:** `<ms style="qt#-s" @sid @who/> / <ms style="qt#-e" @eid/>`

sid

A unique identifier which can be used to unambiguously identify the starting milestone, and to clearly associate the starting milestone with the ending milestone (**eid**). The **sid** can be composed of any mixture of numbers, letters, and underscores.

eid

A unique identifier which can be used to unambiguously identify the ending milestone, and to clearly associate the ending milestone with the starting milestone (**sid**). If an **sid** attribute is used for the starting milestone in a milestone pair, the ending milestone must include **eid**.

who

The speaker of the quotation (*default attribute*)

 </para>

USFM

Example 472. Acts 17:22-31 (GNT) - 2 levels

\p
 \v 22 Paul stood up in front of the city council and said,
 \qt1-s |sid="qt1.ACT.17:22.1" who="Paul"*I see that in every way you
 Athenians are very religious.
 \v 23 For as I walked through your city and looked at the places where you
 worship, I found an altar on which is written, "To an Unknown God." That
 which you worship, then, even though you do not know it, is what I now
 proclaim to you.
 \v 24 God, who made the world and everything in it, is Lord of heaven and
 earth and does not live in temples made by human hands.
 \v 25 Nor does he need anything that we can supply by working for him, since
 it is he himself who gives life and breath and everything else to everyone
 \v 26 From one human being he created all races of people and made them live
 throughout the whole earth. He himself fixed beforehand the exact times and
 the limits of the places where they would live.
 \v 27 He did this so that they would look for him, and perhaps find him as
 they felt around for him. Yet God is actually not far from any one of us;
 \v 28 as someone has said,
 \q1 \qt2-s |sid="qt2.ACT.17:28.1" who="someone"*In him we live and move
 and exist.\qt2-e |eid="qt2.ACT.17:28.1"*
 \b
 \m It is as some of your poets have said,
 \q1 \qt2-s |sid="qt2.ACT.17:28.2" who="poets"*We too are his children.
 \qt2-e |eid="qt2.ACT.17:28.2"*
 \b
 \m
 \v 29 Since we are God's children, we should not suppose that his nature is
 anything like an image of gold or silver or stone, shaped by human art and
 skill.
 \v 30 God has overlooked the times when people did not know him, but now he
 commands all of them everywhere to turn away from their evil ways.
 \v 31 For he has fixed a day in which he will judge the whole world with
 justice by means of a man he has chosen. He has given proof of this to
 everyone by raising that man from death!\qt1-e |eid="qt1_ACT_17:22.1"*

The Preaching of John the Baptist

(Matthew 3.1-12; Luke 3.1-18; John 1.19-28)

1 This is the Good News about Jesus Christ, the Son of God.^a It began as the prophet Isaiah had written:

^a 1.1: Some manuscripts do not have *the Son of God*.

^b 1.4: John appeared in the desert, baptizing and preaching; some manuscripts have John the Baptist appeared in the desert, preaching.

\esb \cat History\cat*

\ms Fish and Fishing

\p In Jesus' time, fishing took place mostly on lake Galilee, because Jewish people could not use many of the harbors along the coast of the Mediterranean Sea, since these harbors were often controlled by unfriendly neighbors. The most common fish in the Lake of Galilee were carp and catfish. The Law of Moses allowed people to eat any fish with fins and scales, but since catfish lack scales (as do eels and sharks) they were not to be eaten (\xt Lev 11.9-12\xt*). Fish were also probably brought from Tyre and Sidon, where they were dried and salted.

...

\p Among early Christians, the fish was a favorite image for Jesus, because the Greek word for fish (\tl ichthus\tl*) consists of the first letters of the Greek words that tell who Jesus is: \fig Ihsous Christos Theou uios Swthr| alt="Christian fish image" src="christfish.tif" size="col" ref="1.18"\fig* \esbe

3.6, 22; 7.1-13; 8.11-12), and before long he predicts his coming arrest, condemnation, and crucifixion (8.31; 9.30-31).

Jesus Calls Four Fishermen

(Mt 4.12-22; Lk 4.14-15; 5.1-11)

Jesus' message is about the arrival of the **KINGDOM OF GOD**, which will happen soon. To prepare for it, the people need to repent (1.15). He immediately summons two pairs of fishermen brothers to be his followers and helpers.

¹⁴After John had been put in prison, Jesus went to Galilee and preached the Good News from God. ¹⁵"The right time has come," he said, "and the Kingdom of God is near! Turn away from your sins and believe the Good News!"^{*}

¹⁶As Jesus walked along the shore of Lake Galilee, he saw two fishermen, Simon and his brother Andrew, catching fish with a net. ^{*}

¹⁷Jesus said to them, "Come with me, and I will teach you to catch people." ¹⁸At once they left their nets and went with him.

¹⁹He went a little farther on and saw two other brothers, James and John, the sons of Zebedee. They were in their boat getting their nets ready. ²⁰As soon as Jesus saw them, he called them; they left their father Zebedee in the boat with the hired men and went with Jesus.^{*}

*Jesus Christos Theou
Ulos Swthr*

1.14 *John...in prison* John was arrested by order of **HEROD Antipas** (6.17-18), **TETRARCH** of the provinces of Galilee and Perea.

1.15 *is near* Or "has arrived"; also Mt 3.2.

1.16 *Lake Galilee* A body of fresh water in the province of Galilee, some 21 km (12.5 miles) long and 13 km (7.5 miles) wide at its widest.

net A circular casting net that was looped on the arm and thrown out over the water.

1.19 *getting their nets ready* Or "mending their nets".

1.20 *hired men* Hired on a daily basis to help with the fishing.

Fish and Fishing

In Jesus' time, fishing took place mostly on lake Galilee, because Jewish people could not use many of the harbors along the coast of the Mediterranean Sea, since these harbors were often controlled by unfriendly neighbors. The most common fish in the Lake of Galilee were carp and catfish. The Law of Moses allowed people to eat any fish with fins and scales, but since catfish lack scales (as do eels and sharks) they were not to be eaten (Lev 11.9-12). Fish were also probable brought from Tyre and Sidon, where they were dried and salted.

The creation story tells that God ordered the waters of the earth to bring forth fish along with all other kinds of sea plants and animals (Gen 1.20-22). God gave human beings control over creation, including fish (Gen 1.28; Psa 8.6-8), but people are forbidden to make or worship and image of any created thing, including fish (Deu 4.15-18). When God renews the

creation, the salty Dea Sea will become fresh water and will be filled with fish (Ezk 47.7-10).

Fishing was also an important source of jobs and income in Galilee, and several of Jesus' followers were fishermen. Jesus told them that they were going to bring in people instead of fish (nxt Mrk 1.16,17; Mat 4.18,19nxt*). When Jesus fed the hungry crowd that followed him out of town, the food he provided was bread and fish (Mrk 6.30-44; Mat 14.14-21; Luk 9.10-17). Jesus used fishing to show his disciples the amazing results they could expect from having faith in him and sharing the good news with others: the net the apostles threw into the lake became so full of fish that they could not pull it into their boat (Jhn 21.4-12).

Among early Christians, the fish was a favorite image for Jesus, because the Greek word for fish (*ichthys*) consists of the first letters of the Greek words that tell who Jesus is:

Significant syntax change in USFM/USX 3.x

The syntax for defining illustrations in USFM 3 follows the general syntax for providing [character level attributes](#). In USFM 1.x and 2.x, markup for illustrations required the content for a collection of parameters to be provided in a specific order, with items separated by a vertical bar (e.g. `\fig_DESC|FILE|SIZE|LOC|COPY|CAP|REF\fig*`). The use of marker attributes, and the use of a vertical bar as an attribute separator was unique to illustration markup in USFM 1.x and 2.x. In USFM 3 this syntax is *deprecated* in order to align the markup with the general syntax for [character level attributes](#).

Summary

Description

Figure / illustration.

Syntax

- **USFM:** `\fig caption | @src @size @ref @alt @loc @copy \fig*`
- **USX:** `<figure style="fig" @file @size @ref @alt @loc @copy>caption</figure>`

src (USFM) / file (USX) *

Filename

size *

Illustration relative size. Options are **col** (illustration should be inserted inline within the current text column) or **span** (illustration should be inserted across – 'spanning' – text columns).

ref *

Scripture reference (e.g. Luke 19.5). This text may (optionally) be published together with the illustration caption.

alt

Short, free-form description of image.

loc

Location / range. Specify a range of references at which the illustration might be inserted.

copy

Rights holder/copyright information. This material will be used to provide appropriate illustration attribution in publications.

caption

Illustration caption text.

in bed with a fever, and as soon as Jesus arrived, he was told about her. ³¹He went to her, took her by the hand, and helped her up. The fever left her, and she began to wait on them.

Took her by the hand, and...the fever left her. (1.31)

³² After the sun had set and evening had come, people brought to Jesus all the sick and those who had demons. ³³ All the people

begged him for help. "If you want to," he said, "you can make me clean."^c

⁴¹ Jesus was filled with pity,^d and reached out and touched him. "I do want to," he answered. "Be clean!" ⁴² At once the disease left the man, and he was clean. ⁴³ Then Jesus spoke sternly to him and sent him away at once, ⁴⁴ after saying to him, "Listen, don't tell anyone about this. But go straight to the priest and let him examine you; then in order to prove to everyone that you are cured, offer the sacrifice that Moses ordered."

⁴⁵ But the man went away and began to spread the news everywhere. Indeed, he talked so much that Jesus could not go into a town publicly. Instead, he stayed out in lonely places, and people came to him from everywhere.

Jesus Heals a Paralyzed Man

(Matthew 9.1-8; Luke 5.17-26)

2 A few days later Jesus went back to Capernaum, and the news spread that

Peripherals

The following strategy should be used for marking project peripheral contents.

Content should be created in separate book files according to the general groupings shown in the list of [peripheral book and division IDs](#).

In USFM: An [id - Book identification](#) paragraph identifies the overall content of the peripheral file. Within each book, divisions (sub-sections) of content are denoted using a [periph - Peripheral division](#) marker.

In USX: A [book](#) element identifies the overall content of the peripheral file. Within each peripheral file, divisions (sub-sections) of content are contained within a [periph - Peripheral division](#) element.

Content is added to books and divisions using the most appropriate existing USFM/USX [paragraph](#), [character](#), [table](#) or [note](#) markup.

Some larger back matter content is maintained it within its own book file (Concordance, Glossary, Topical Index, Names Index). These contents do not require a [periph - Peripheral division](#) division identifier.

- Tables
- `bk` - Quoted book title, `qt` - Quoted text, `tl` - Transliterated words or other character types.
- `fig` - Figure

Examples

USFM

```
\id INT
\periph Old Testament Introduction|id="intot"
\mt1 Introduction to the Old Testament
\p The Old Testament is a record of Israel's experience of what God is like and
what the people who worship God should be like. It proclaims the LORD God as
the
creator of the world and it tells how God blesses people and establishes
relations
with people through special agreements called covenants.
...
\periph Pentateuch Introduction|id="intpent"
\s1 The Pentateuch
\p "Pentateuch" is a term that means "five scrolls (books)" and is used to
describe the five books that are positioned at the beginning of both Jewish and
Christian Bibles.
...
\periph Deuterocanon Introduction|id="intdc"
\mt1 Deuterocanonicals/Apocrypha
\p Most of the books gathered in this section were part of an ancient
translation
of the Hebrew Scriptures into Greek called the Septuagint which was widely read
by
```

Christians in the early church.

...

\periph New Testament Introduction|id="intnt"

\mt1 New Testament

\p The books of the New Testament were written by the followers of Jesus Christ.
